Lower gas prices! This bill reflects a decrease in the Supply portion of your gas bill, effective on and after February 1, 2023. The change in the Supply portion is due to a decrease in the Estimated Gulf Coast Cost of Gas. As a result of this change, a typical residential customer who uses 172 therms in a winter month and 1,040 therms annually, will see a monthly decrease of \$25.80, or approximately 11.78%. Tariff information can be found at pseg.com.

This bill reflects increases in the Delivery and Supply portions of your electric bill, effective on and after February 1, 2023. The changes in the Delivery portion are due to increases in the Zero Emission Certificate Recovery Charge and the Solar Pilot Recovery Charge. The change in the Supply portion is the result of changes to the Transmission rate. As a result of these changes, a typical residential customer who receives electric Supply from PSE&G and uses 740 kilowatt-hours in a summer month and 6,920 kilowatt-hours annually will see an average monthly increase of \$1.39 or 0.99%. Tariff information may also be found by visiting pseg.com.

--------------------------	-----------------

Explaining gas charges

We measure the volume of gas you use in cubic feet (CCF) and then convert it to therms.

If you used a standard gas clothes dryer, it would take about 6 hours to equal 1 therm of energy.

About the balancing charge

The balancing charge includes pipeline, storage and other costs associated with seasonal peaks in usage. It applies from October to May.

Price to compare

If you want to consider getting your gas supply from another supplier, you can compare their price with ours. This month, your cost for gas supply is \$66.70 (or an average of 0.63680281 per therm). This *price to compare* varies from month to month, depending on your usage.
